Seite 2 von 15

■ ubg = untere Bestimmungsgrenze ■ n = Zahl der Analysedaten im Berichtsjahr ■ Min = Minimum ■ p10, p50, p90 = Perzentilwert ■ Mit = Mittelwert ■ Max = Maximum ■ \* = zu wenig Warnmeldungen (Für die Erläuterung der Piktogramme: siehe letzte Seite dieses Berichtes) ■ ! = Reihe, völlig oder teilweise zusammengestellt aus durch Neuralnetz geschätzten Werten.

Bei den Werten in den verschiedenen Monatsspalten der Tabellen kann es sich, abhängig von der Messfrequenz, um Einzel- oder Mittelwerte handeln. Für die Berechnung der statistischen Kennzahlen werden aber immer die individuellen Messwerte verwendet. Diese individuellen Werte können selbstverständlich bei uns angefordert werden.

Seite 4 von 15

■ ubg = untere Bestimmungsgrenze ■ n = Zahl der Analysedaten im Berichtsjahr ■ Min = Minimum ■ p10, p50, p90 = Perzentilwert ■ Mit = Mittelwert ■ Max = Maximum ■ \* = zu wenig Warnmeldungen (Für die Erläuterung der Piktogramme: siehe letzte Seite dieses Berichtes) ■ ! = Reihe, völlig oder teilweise zusammengestellt aus durch Neuralnetz geschätzten Werten. Bei den Werten in den verschiedenen Monatsspalten der Tabellen kann es sich, abhängig von der Messfrequenz, um Einzel- oder Mittelwerte handeln. Für die Berechnung der statistischen Kennzahlen werden aber immer die individuellen Messwerte verwendet. Diese individuellen Werte können selbstverständlich bei uns angefordert werden.

dinsdag 16 juli 2013

■ ubg = untere Bestimmungsgrenze ■ n = Zahl der Analysedaten im Berichtsjahr ■ Min = Minimum ■ p10, p50, p90 = Perzentilwert ■ Mit = Mittelwert ■ Max = Maximum ■ \* = zu wenig Warnmeldungen (Für die Erläuterung der Piktogramme: siehe letzte Seite dieses Berichtes) ■ ! = Reihe, völlig oder teilweise zusammengestellt aus durch Neuralnetz geschätzten Werten. Bei den Werten in den verschiedenen Monatsspalten der Tabellen kann es sich, abhängig von der Messfrequenz, um Einzel- oder Mittelwerte handeln. Für die Berechnung der statistischen Kennzahlen werden aber immer die individuellen Messwerte verwendet. Diese individuellen Werte können selbstverständlich bei uns angefordert werden.

Seite 7 von 15

■ ubg = untere Bestimmungsgrenze ■ n = Zahl der Analysedaten im Berichtsjahr ■ Min = Minimum ■ p10, p50, p90 = Perzentilwert ■ Mit = Mittelwert ■ Max = Maximum ■ \* = zu wenig Warnmeldungen (Für die Erläuterung der Piktogramme: siehe letzte Seite dieses Berichtes) ■ ! = Reihe, völlig oder teilweise zusammengestellt aus durch Neuralnetz geschätzten Werten. Bei den Werten in den verschiedenen Monatsspalten der Tabellen kann es sich, abhängig von der Messfrequenz, um Einzel- oder Mittelwerte handeln. Für die Berechnung der statistischen Kennzahlen werden aber immer die individuellen Messwerte verwendet. Diese individuellen Werte können selbstverständlich bei uns angefordert werden.

dinsdag 16 juli 2013

■ ubg = untere Bestimmungsgrenze ■ n = Zahl der Analysedaten im Berichtsjahr ■ Min = Minimum ■ p10, p50, p90 = Perzentilwert ■ Mit = Mittelwert ■ Max = Maximum ■ \* = zu wenig Warnmeldungen (Für die Erläuterung der Piktogramme: siehe letzte Seite dieses Berichtes) ■ ! = Reihe, völlig oder teilweise zusammengestellt aus durch Neuralnetz geschätzten Werten. Bei den Werten in den verschiedenen Monatsspalten der Tabellen kann es sich, abhängig von der Messfrequenz, um Einzel- oder Mittelwerte handeln. Für die Berechnung der statistischen Kennzahlen werden aber immer diindividuellen Messwerte verwendet. Diese individuellen Werte können selbstverständlich bei uns angefordert werden.

Seite 12 von 15

■ ubg = untere Bestimmungsgrenze ■ n = Zahl der Analysedaten im Berichtsjahr ■ Min = Minimum ■ p10, p50, p90 = Perzentilwert ■ Mit = Mittelwert ■ Max = Maximum ■ \* = zu wenig Warnmeldungen (Für die Erläuterung der Piktogramme: siehe letzte Seite dieses Berichtes) ■ ! = Reihe, völlig oder teilweise zusammengestellt aus durch Neuralnetz geschätzten Werten.

Bei den Werten in den verschiedenen Monatsspalten der Tabellen kann es sich, abhängig von der Messfrequenz, um Einzel- oder Mittelwerte handeln. Für die Berechnung der statistischen Kennzahlen werden aber immer die individuellen Messwerte verwendet. Diese individuellen Werte können selbstverständlich bei uns angefordert werden.

Seite 14 von 15

■ ubg = untere Bestimmungsgrenze ■ n = Zahl der Analysedaten im Berichtsjahr ■ Min = Minimum ■ p10, p50, p90 = Perzentilwert ■ Mit = Mittelwert ■ Max = Maximum ■ \* = zu wenig Warnmeldungen (Für die Erläuterung der Piktogramme: siehe letzte Seite dieses Berichtes) ■ ! = Reihe, völlig oder teilweise zusammengestellt aus durch Neuralnetz geschätzten Werten.

Bei den Werten in den verschiedenen Monatsspalten der Tabellen kann es sich, abhängig von der Messfrequenz, um Einzel- oder Mittelwerte handeln. Für die Berechnung der statistischen Kennzahlen werden aber immer die individuellen Messwerte verwendet. Diese individuellen Werte können selbstverständlich bei uns angefordert werden.
